Professional Summary

IT Systems Administrator with nearly five years of progressive IT experience, advancing from sole IT resource to enterprise systems administration for multi-site agricultural organizations. Led the evaluation and implementation of enterprise ITSM and endpoint management platforms and the adoption of macOS as a supported enterprise platform. Bilingual (English/Spanish) leader with student government, nonprofit board, and statewide public speaking experience.

Technical Skills

Platforms: Freshservice, NinjaOne RMM, Apple Business Manager, Microsoft Entra ID, Google Workspace, Proxmox

Systems & Scripting: Windows, macOS, iOS/iPadOS, PowerShell, CMD, Python, SQL, HTML/CSS, JavaScript, Git/GitHub, VoIP

Capabilities: Endpoint and patch management, zero-touch provisioning, software packaging and deployment, ITSM administration, identity provider (IdP) administration, SSO integration, alert management and status pages, identity and access management (RBAC, least privilege), virtualization

Professional: Vendor evaluation, cost-benefit analysis, requirements gathering, project management, technical documentation, executive reporting

Experience

Beef Northwest Feeders — **North Powder, OR**

IT Systems Administrator — April 2026 – Present

- Administer endpoint management for ~250 Windows and macOS devices, plus iOS and iPadOS mobile devices, supporting ~500 employees across multiple locations and states, covering device lifecycle, security, compliance, software deployment, and policy.
- Lead administration of the organization's ITSM and RMM platforms, owning configuration, automation, and continuous improvement; designed the phased, organization-wide RMM deployment, now complete across all managed endpoints.
- Led the adoption of macOS as an officially supported enterprise platform, including automated Apple device enrollment, management standards, deployment workflows, and operational processes.
- Administer the organization's identity provider, managing authentication policies, role-based access control, license optimization, and SSO integrations with enterprise business systems.
- Enhanced enterprise status reporting through centralized alert management, automated incident publishing, and separate end-user and IT-facing status pages.
- Design and automate executive and operational reporting that gives IT leadership and senior management actionable insights.
- Partner with data and software development teams on IdP and broader system-to-system integrations, defining integration requirements, validating data mapping, and supporting interoperability.

IT Intern — June 2025 – April 2026

- Led a solo ITSM platform evaluation, auditing 8 platforms against 20+ capability criteria, completing a cost-benefit analysis of 3 finalists, and presenting a formal recommendation to IT leadership.
- Implemented the selected platform end to end, including a self-service portal, AI-powered chatbot, knowledge base, automated ticket routing, onboarding/offboarding workflows, and a system status page, replacing a fully manual help desk.
- Evaluated 4 endpoint management and security vendors on OS patching, zero-touch provisioning, software deployment, PowerShell/CMD scripting, compliance visibility, and vulnerability remediation; delivered a multi-year cost-benefit analysis and recommendation.
- Promoted to Systems Administrator within 10 months while completing full-time coursework.

Material Flow & Conveyor Systems, Inc. — **Donald, OR**

IT Specialist II — December 2023 – May 2026

- Managed critical business systems, including website, CRM, accounting software, on-site servers, and cloud file hosting, maintaining 99% uptime.
- Generated $20,000+ in annual cost savings through a systems audit, elimination of redundant tools, and migration to modern platforms.
- Led a full VoIP system overhaul from scoping through post-implementation review, improving communication efficiency by 20%.
- Managed the internal help desk with a 95% first-contact resolution rate and consistent SLA tracking and documentation.
- Maintained and tuned 50+ workstations, reducing reported technical issues by 30%.

- Drove IT initiatives that increased organization-wide productivity by 15% and improved cross-department collaboration.

Information Technology Specialist November 2021 – December 2023

- Served as sole IT resource for 15 workstations and 3 on-site servers, maintaining 99.9% uptime.
- Administered an e-commerce platform serving ~200,000 annual users and integrated and maintained 30+ software systems.
- Led a website CMS redesign and migration, increasing traffic by 20% and user engagement by 15%.
- Developed digital advertising strategies that expanded audience reach by 20% and improved conversion rates.

Education

Oregon Institute of Technology **Klamath Falls, OR**
Bachelor of Science in Information Technology Expected June 2027
